EBITDA margin	7.0%	9.4%	+2.4 pts	

EBITDA BRIDGE, USD THOUSANDS

Most late orders start with stock nobody checked.

CAUSES OF LATE DISPATCH, SHARE OF LATE ORDERS, FY2026

68% of late orders start with stock that was never confirmed or a substitution nobody approved.

TODAY

Promises run ahead of stock

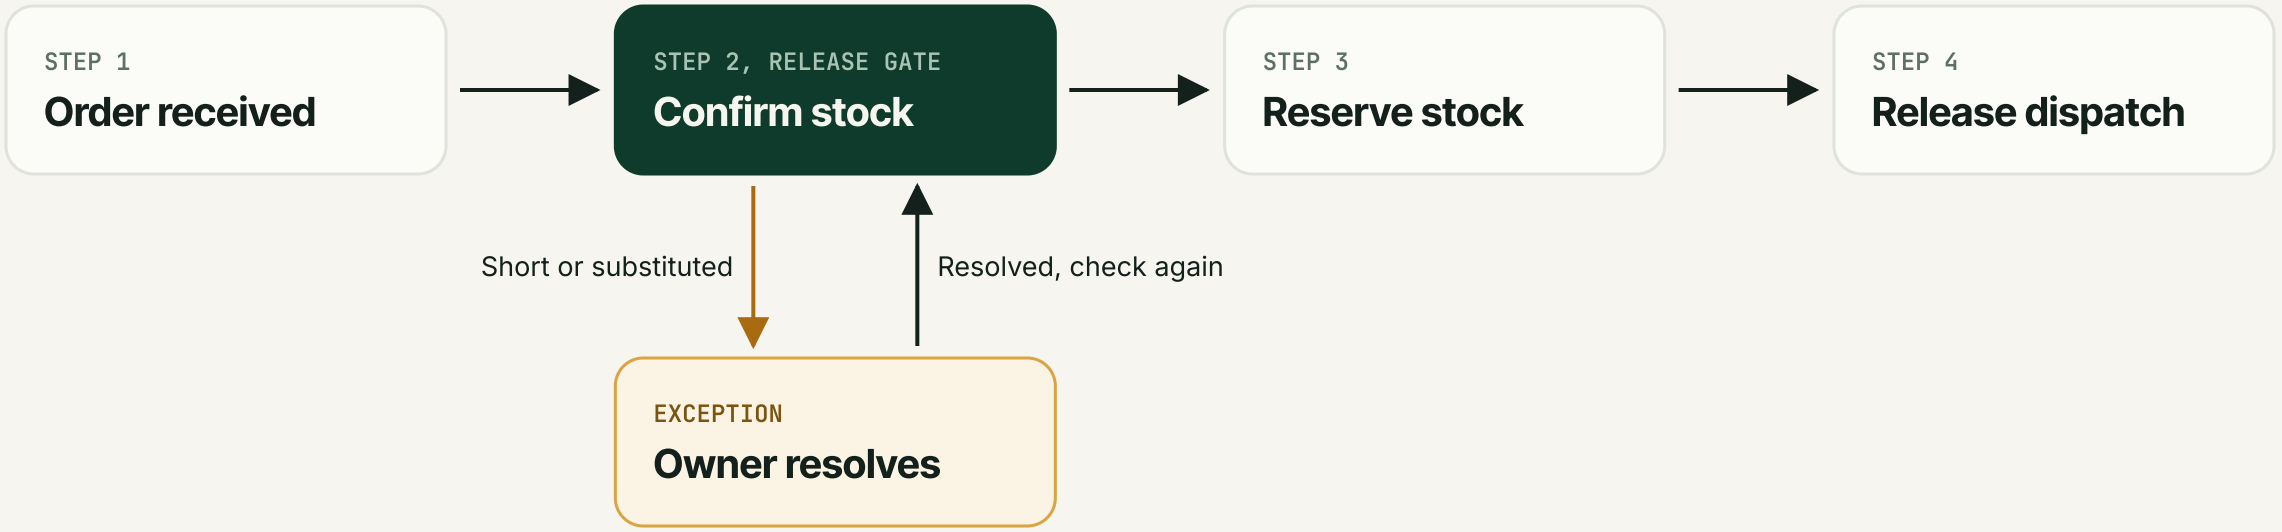

- Orders are promised before stock is checked.
- Shortages surface at picking, after the promise.
- Substitutions wait in email with no owner.

CHANGE

Confirm, then promise

- Confirm stock before it is reserved.
- Give every exception one owner and a deadline.
- Review open exceptions every week.

One release gate protects the customer promise.

RULE 1

Only confirmed stock moves on to reservation.

RULE 2

Shortages and substitutions go to one named owner.

RULE 3

A resolved exception goes back through the gate.

A 90-day rollout, one owner for each phase.

DAYS 1 TO 30

Day 30: Baseline report

DAYS 31 TO 60

Day 60: Pilot review

DAYS 61 TO 90

Day 90: Go or revise decision

OWNER

Operations lead

- Define the stock check
- Baseline late dispatch
- Log every exception

DONE WHEN

Every late order has a recorded cause.

OWNER

Warehouse lead

- Pilot the release gate
- Review failed checks weekly
- Train dispatch owners

DONE WHEN

The gate has run at one site for four weeks.

OWNER

Commercial lead

- Extend the pilot to all sites
- Review service results
- Approve or revise the process

DONE WHEN

Results are reviewed and the decision is recorded.

Northline Industrial

DECISION REQUESTED

Approve a 90-day release-control pilot with weekly exception reviews.

Pilot cost and the dispatch baseline are confirmed in the first 30 days, before the pilot is extended.

HOW WE WILL KNOW IT WORKED

MEASURE	TODAY	DAY 90
On-time dispatch Orders shipped on the promised day	91%	**95%**
Exceptions with a named owner Logged at the release gate	Not tracked	**100%**
Unapproved substitutions Per month, all sites	Not tracked	**0**
