A presentation system built on one real story

Northline is a presentation design study for a fictional industrial company. An eight-slide executive review and fifteen layouts all carry the same business story, so you can judge the system on finished content instead of placeholder text.

What is in the set

8
Executive review
Results, diagnosis, process change and a decision, in that order.

15
Layout gallery
Every layout shown with the same Northline content and numbers.

2
Design guide
Type, colour, chart rules and the review list on the next page.

Layout index

01 Cover

03 Section
04 Narrative
05 Two columns
06 Three columns
07 Comparison
08 Metrics
09 Picture and caption
10 Statement
11 Chart
12 Table
13 Process
14 Team
15 Decision

Three rules every slide follows

One slide, one point
If a slide needs two headlines, it is two slides.

The headline is the conclusion
"EBITDA rose 47%" tells the reader more than "Profit overview".

Evidence sits next to the claim
The chart or table that proves the headline is on the same slide, with its unit and period.

Type

Slide headline	**Revenue grew 10%**	Inter Tight 700, 42 px
Key figure	**$13.2M**	Inter Tight 700, 68 px
Body	Confirm stock before it is reserved.	Inter 400, 16 to 20 px
Label	ON-TIME DISPATCH	Inter 600, 12 px caps
Codes and steps	STEP 2, RELEASE GATE	JetBrains Mono, 12 px

Numbers in tables and charts use Inter with tabular figures so columns line up.

Colour

Deep green
#0e3b2b
Covers, decision panels

Green
#175841
Current period, key marks

Sage

Targets and thresholds

Charts and tables

- State the unit and period beside every figure.
- Prior period in sage, current period in green, so the eye goes to now.
- Label values directly. Keep gridlines faint.
- Right-align numbers. Rule and bold the total row.
- No chart with a single data point. Use a key figure instead.

Before you send

- Read every headline aloud. Does it state the conclusion?
- Check that totals, rounding and percentages agree across slides.
- Remove sample text and unused layouts.
- Record the source and rights for every image.
- Export the PDF and read it on a laptop and a phone.

> **About these files.** The PDFs show each layout as designed. Native PowerPoint behaviour, such as editing charts or reapplying layouts, has only had limited checks, so treat the set as a design reference rather than a tested template.
